

## **Sprint 2 Planning – Apple Haptics PM Simulation**

**Sprint Duration:** 1 Week (7 Calendar Days)

**Sprint Dates:** June 28 – July 3

---

### **Sprint 2 Goals:**

- Develop early structure through stakeholder roles and visual mapping.
  - Identify and document risks that may impact feature rollout or execution.
  - Initiate early-stage visual direction through wireframes/mockups (optional).
  - Finalize pending deliverables from Sprint 1 (SRS, WBS).
- 

### **Tasks:**

1. Finalize and upload Stakeholder\_Map.png.
  2. Create basic wireframes/mockups to simulate haptics interaction on OTT UI (Wireframes.pdf).
  3. Create and export Risk\_Identification\_Sheet.xlsx.
  4. Finalize and export SRS\_Document.pdf and WBS\_Breakdown.pdf.
  5. Upload all finalized documents in appropriate GitHub folders.
  6. Write and export Sprint\_2\_Planning.pdf.
- 

### **Sprint Outcome:**

By July 3, Sprint 2 concludes with finalized risk documentation, stakeholder alignment, and core technical reference files (SRS, WBS). Project is now ready for KPI setup and user profiling in Sprint 3.
